## Project Concept

### 1 Player Control

You control a *Person (Defender)* in this *Bird's eye view* game  
where *The arrow keys and Key R* makes the player *Move forward/backward/rotate & Run respectively.*

### 2 Basic Gameplay

During the game, *Cubes* appear from *The sides of the screen*  
and the goal of the game is to *Push the cubes away from the tower.*

### 3 Sound & Effects

There will be sound effects *When the defender kicks the cubes, and on using powerUps* and particle effects *When the cubes are thrown out of the scene, and when the cubes strike the tower.*  
[optional] There will also be *Background music throughout the game.*

### 4 Gameplay Mechanics

As the game progresses, *Power Ups appear* making it *Easier for defender to push away the cubes at once.*  
[optional] There will also be

### 5 User Interface

The *Tower* will *Decrease height* whenever *The cubes hit it.*  
At the start of the game, the title *"Defend the Tower"* will appear and the game will end when *The tower is destroyed or if the player falls off the scene.*

## 6

Other  
Features

*X and V rotates the camera view counter clockwise and clockwise respectively.*

## Project Timeline

| Milestone | Description                                          | Due   |
|-----------|------------------------------------------------------|-------|
| #1        | - A map and player movement                          | 10/13 |
| #2        | - Cube prefabs and randomization                     | 10/14 |
| #3        | - Finish Game Logic                                  | 10/15 |
| #4        | - Add UI elements like Start, Restart and Game Over. | 10/16 |
| #5        | - Finalize everything                                | 10/17 |
| Backlog   | - Maybe give different types of powerups             | mm/dd |
